Download Desktop Google Reader Related Posts About Jean-Michel Servieres Jean-Michel Servieres is a technology enthusiast, who loves to share his discoveries on Android & Linux. Founder of the BLOG:XP client.Ralph McGill was a shrewd observer of his time and place, and these reflections on The State of Black America, written in 1950, reflect those observations. At the heart of the essay is the question of whether or not black people, as a whole, are ready to assume the obligations of citizenship and to share the burden of self-government. In his view, most aren't, or won't be—in some cases for lack of education, in others for the color of their skin, and still others because of the influence of predatory and exploiters of the negro. McGill goes back to the early days of the nation, remarking on the contributions of black people not only in agriculture and commerce, but in the professions (where he says early Harvard President James Freeman Clarke earned his keep as an undertaker) and even to the arts. He does not include in that latter group those writers whose vision he finds lacking. Writing in the early 20th century, he saw black art and literature as being "infantile and childish," only approximating the quality of black experiences. Literary and artistic output would improve but not necessarily, he feared, until the "physical aspect of race relations is changed." Black people should be demanding something of their own, McGill counseled, and they should be asking for it, and if they are not, they "must be prepared to

What's New in the Desktop Google Reader?

Desktop Google Reader is an easy to use program that brings Google Reader right on your desktop, letting you read all your feeds without the need for opening the browser and loading the service. Instead, Desktop Google Reader logs into your Google Reader account and retrieves all the feeds, with dedicated tools that automatically check the feeds for new articles at a user-defined interval. With a very appealing design, the program not only that provides access to your Google Reader feeds, but it also comes with support for the most popular social networks on the Internet, which means that you can post an article on your Facebook page for instance with just a click. In addition, Desktop Google Reader comes with a built-in browser, so just double click any feed you want and you shall see the article loaded right in the main window. Pressing TAB however launches it in your default external browser, but there's no option to use this one as default. Another good thing about Desktop Google Reader is the notification tool that alerts you as soon as new items are received, with support for Snarl for more eye-candy notification windows. The application doesn't slow down the computer at all and it works like a charm on all Windows versions. What's more, it's stable and reliable even when downloading a large amount of feeds. Overall, it's pretty clear that this is one of the best ways to manage your Google Reader feeds straight from the desktop, as it offers not only a pleasant interface, but also an auto-refresh tool and notifications.
